

VO's DRM Solutions & Services

Protect your premium content and your business

VO's DRM agnostic content protection enables secure distribution and rights management of Live, VOD catch-up and replay video content

Gain a trusted partner

VO is a best-of-breed security provider, engaged with operators around the world in their fight against content piracy inside and outside their network. VO's solutions are trusted by customers and major studios.

Multi-DRM backend and DRM solutions

Rapidly deploy Widevine, FairPlay, PlayReady and VO DRM licenses from a unified backend on-premise or 'as a service' in the cloud.

Unified Broadcast, IPTV and OTT solution

Manage user rights and protect your premium content with a comprehensive security solution that covers all your distribution networks.

Digital Rights Management – anytime, anywhere

Tier-1 Grade Content Security

Single content authority enabling premium UHD/4K service delivery

High license delivery rate up to 1000 licenses per second

Multiscreen, Multilevel Secure Experiences

Includes 3 levels of security according to device capabilities and content security requirements

End-To-End Security Management

Integrated with VO's secure video player to ensure a secure content delivery and playback path

Multiple DRM Support

Handles license requests from all device types with Widevine, FairPlay, PlayReady and VO DRM

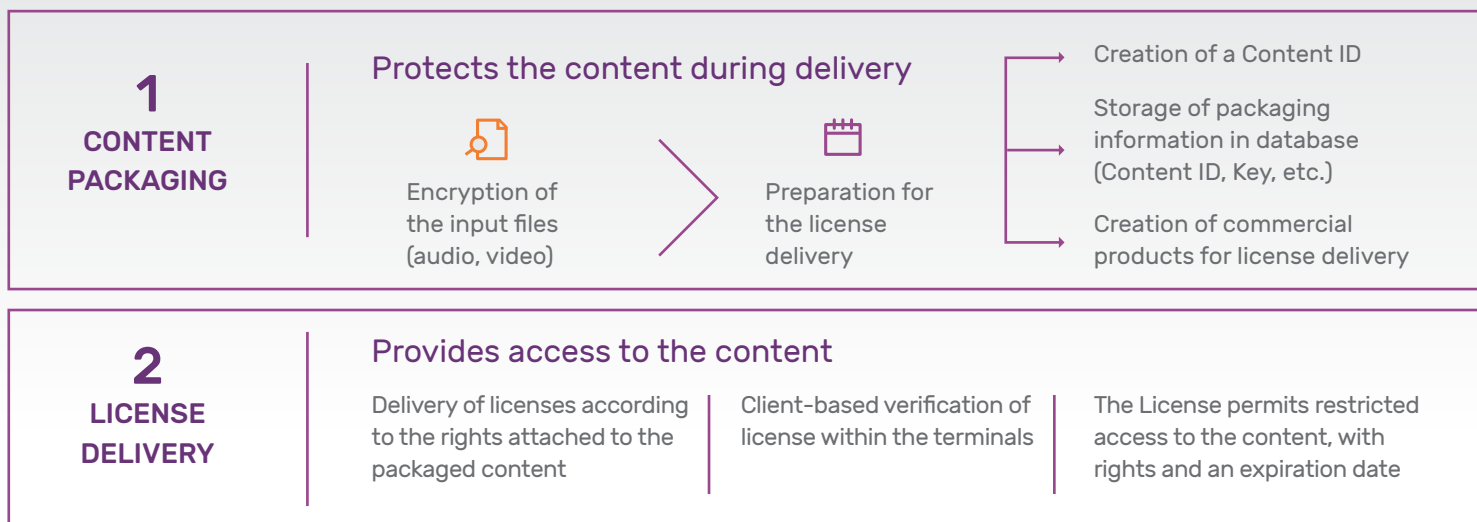

Flexible and Scalable

Designed for Tier-3 to Tier-1 operators; includes peak management, key rotation and parental control

Advanced Analytics

Collects and analyzes data which can be used to counteract piracy and update device security

It's smarter, it's safer. It's VO.

Collaborate with security experts who have a proven track record

Viaccess-Orca supports its customers with complete, secure management of their TV services from initial deployment through a lifetime of service delivery.

Track and destroy

Anti-piracy services identify web platforms that illegally stream your content, then counteracts by dereferencing the links

Monitoring

Constant monitoring of devices and platforms to detect intrusions or attempted attacks

Detect and fight back

Embedded cybersecurity mechanisms incorporates breach detection that enables counter-action

Consultants

Assist with security planning and requirements
